

Questions

1. We are slowly destroying the earth. The seas and the rivers are too dirty to swim in. There is so much smoke in the air that it is unhealthy to live in many of the world's cities. In one well-known city, for example, poisonous gases from cars pollute the air so much that traffic policemen have to wear oxygen masks.
- We have cut down so many trees that there are now vast areas of waste-land all over the world. As the result, farmers in parts of Africa cannot grow enough to eat. In certain countries in Asia there is too little rice. Moreover, we do not take enough care of the countryside. Wild animals are quickly disappearing. For instance, tigers are rare in India now because we have killed too many to survive. However, it is not enough simply to talk about the problem. We must act now before it is too late to do anything about it. Join us now. Save the Earth. This is too important to ignore.

Question 01: The seas and rivers nowadays _____.

- A. are dirty enough to swim in
 - B. are less dirty than they are used to be
 - C. cannot be swum in
 - D. are too dirty to swim in
2. We are slowly destroying the earth. The seas and the rivers are too dirty to swim in. There is so much smoke in the air that it is unhealthy to live in many of the world's cities. In one well-known city, for example, poisonous gases from cars pollute the air so much that traffic policemen have to wear oxygen masks.
- We have cut down so many trees that there are now vast areas of waste-land all over the world. As the result, farmers in parts of Africa cannot grow enough to eat.
